

Sparkle and shine.

## Brillux Hydro-PU Metallic Finish

New: For eye-catching accents

# Make the room shine

Metallic surfaces provide highlights in trendy interior designs. They add a certain 'je ne sais quoi', whether that's in a restaurant, exhibition space, trade fair construction and shop fitting or in private residential spaces. Hydro-PU Metallicfinish from Brillux gives painted interior surfaces that powerful, expressive look.

The innovation is brought to life with a fine metallic sheen, with an excellent depth effect, that can be brought to life in any color. That's because the finish is transparent and, as the top coat, transforms any Brillux Hydro-PU paint coating into a metallic paint coating. Of course, all premium properties are included:

The water-based, low odor Hydro PU metallicfinish is easy to apply and scores points with its great surface quality and long-lasting color accuracy. The shimmering solution to glossy metallic accents!

The Hydro-PU Metallicfinish from Brillux gives interior surfaces that special shine. The basis for the coating are colored Brillux Hydro-PU paint coatings, which are applied to components such as doors, frames, wooden paneling, and wall surfaces. The properties:

- Specially set for efficient spray application
- Water-based, low-odor
- Silk gloss
- High stability
- Quick drying
- Block-resistant
- Extremely low tendency to yellowing
- Hard-wearing and cleanable
- Outstanding flow
- Meets EN 71-3 Safety of toys, resistant to saliva and perspiration

## The perfect finish for every single spray application

The coating material must be right for use – that's the formula to getting the best result. That's why the Hydro-PU Metallicfinish is available for different types of spray application in two versions:

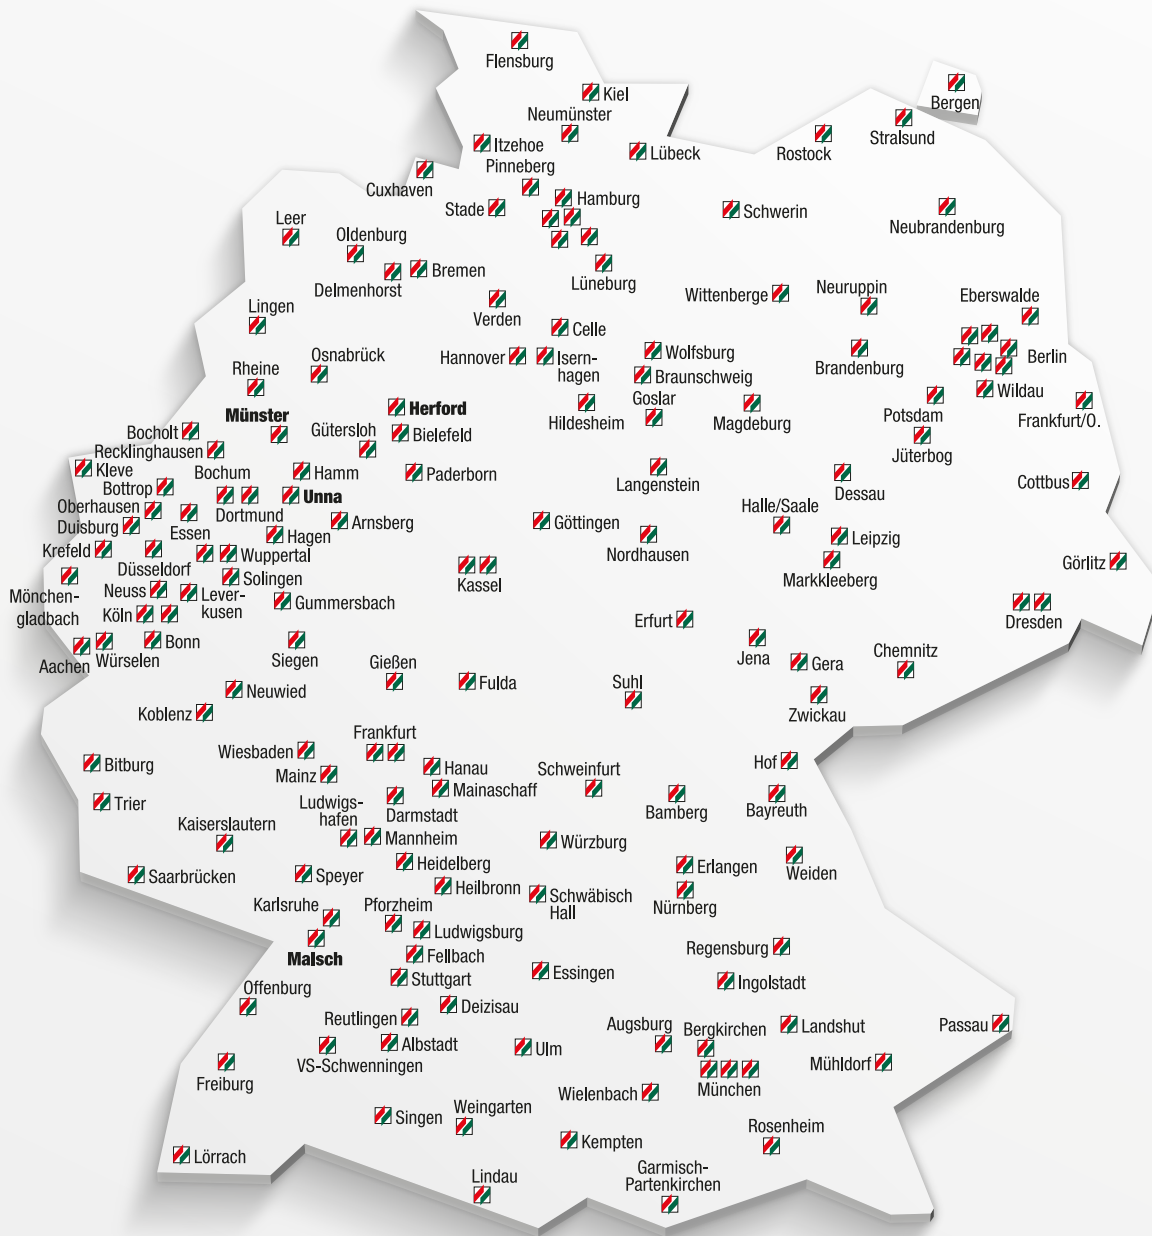

- **Hydro-PU-Spray Metallicfinish 2177**  
is ideally suited to Airless/AirCoat processing on Hydro-PU-Spray Silk Matt Enamel 2188.
- **Hydro-PU-XSpray Metallicfinish 2277**  
has been developed for XVLVLP use on Hydro-PU-XSpray Silk Matt Enamel 2288.

To create metallic color shades that are as realistic as possible according to known Color Systems, e.g., Scala and RAL, as well as DB color shades, we recommend using on a coordinated base color shade. These are available in all Hydro-PU paints using the Brillux Color System.
